Thank you so much, Henri. Much like discovering a bit of Sushi's ancestry has helped me cope, I can't tell you what peace of mind this brings me.

I always thought I had another 10-15 years with my boy, and I can't help but feel it's my fault for not understanding his needs better. I want nothing more than for these two guys to hopefully outlast me, because the Lord knows I can't handle another loss like Sushi's.

If you have any literature/authors you recommend on Siamese cats or any special health needs exclusive to their breed, I would be grateful. I've scoured the internet but there's such contrasting information out there depending on the source. Either way, thank you very much for taking the time to send this

Tia

to Henri

Henri,

If this helps to understand where I am coming from, this is the website that I have been using to research Sushi's history. This is where I recorded his death and also discovered two of his siblings died very young.
